Butler ... Show Menu

Product Backlog

- Restaurant Search Engine: 3. As Javier (Customer), I want to search for restaurants based on rating, so that I know which places would draw in the most views to my blog.
- Restaurant Search Engine: 6. As Fiona (Customer), I want to search for restaurants based on their cuisine, so that I can make sure the food I order meets my dietary needs.
- Restaurant Search Engine: 7. As Bonny (Customer), I want to search for restaurants by price, so that I can stay within my tight budget.
- Online Ordering

Sprint Backlog

- Restaurant Page Profile 2. As Steve (Restaurant Owner), I want to showcase personal stories and anecdotes about my dishes, so that customers can understand the history behind them.
- Restaurant Page Profile 4. As Steve (Restaurant Owner), I want to upload simple photos of my dishes and restaurant, so that I can promote exactly how I did in traditional media.
- Restaurant Page Profile 5. As Fiona (Customer), I want to see videos of how restaurants make their food, so that I can feel safe ordering it for me and my children.

Tasks

- (1 T5 P3) Write unit tests for the backend portion of the web form
- (2 T4 P3) Write unit tests for the backend portion of the web form
- (4 T1 P1) Create UI Form to submit photos
